

MODEL 15T/H - INCREMENTAL ENCODER

Ø1.5"

FEATURES

- Very High Performance Economical Encoder
- Low Profile 1.0" (25.4 mm) Height and 1.5" (38 mm) Diameter
- Thru-Bore with Sizes up to 0.375" (10 mm)
- Simple, Innovative Flex Mounting System (Global Mounting Standards)
- Up to 12 Pole Commutation Optional for Brushless Motor Control

The Model 15T or 15H offers a high performance feedback solution in a low profile package. Unlike modular or kit encoders, the Model 15 utilizes an integral bearing set and an innovative flexible mounting system which are much more tolerant to axial misalignment or radial shaft run-out. The slotted flex mounts provide 20 or 30 degrees of rotational adjustment for commutation or index pulse timing. Installation is quick and easy—for brushless servo motor applications, three 120° electrical phase tracks can provide up to 12 pole commutation feedback. The optional 100° C and 120° C temperature options allow servo motors to operate at higher power outputs and duty cycles. The Model 15 provides stable and reliable operation and is an excellent replacement for other manufacturers' modular encoders where a high performance solution is desired.

COMMON APPLICATIONS

- Servo Motor Control, Robotics, Specialty Assembly Machines,
- Digital Plotters, High Power Motors
